

SUMP cleaner for sludge and muds.

Designed for a complete cleaning of CNC machines.

- Vacuums up to 132 gallons of coolant, oils and emulsions mixed with chips, dust and sludge.
- Solids and chips are separated into an integrated container, the liquids are purified by a filtering TNT sheet.
- Possibility of cleaning the emptied tank through adjustable high pressure lance.
- Independent pump 53 gal/min for the recovery of the lubricants.

TECHNICAL DATA		OILVAC 500
Voltage	V - Hz	400 -60 3~
Power	kW	4
Waterlift max.	in.H ₂ O	126
Continous Waterlift	in.H ₂ O	94
Air Flow max.	cfm	247
Filter surface		Filtering sheet in TNT
Filter grade	μ	50
Liquids capacity	gal	132
Solids capacity	gal	20
Floating device		Yes Electric
Liquids discharge system		Electric pump 53 gal/min
Solids discharge system		Dump tank with a forklift
Washing system		Adjustable High-Pressure lance 0-70 bar
Noise level (EN ISO 3744)	dB(A)	75
Dimensions	in	72x40x53 H
Weight	lbs	1,146

Standard version		
OILVAC 500		OILVAC500-001
